

## Instructions

The internet as it was  
meant to be. **Easy.**

High-Speed Internet

PC Card

Voice Bundle

Networking

Just plug in the wireless  
modem and surf at  
broadband speeds  
anywhere in the Clearwire  
coverage area.

## Features and Options

- **Simple** — *Plug and play technology* • Easier setup than DSL or cable • No technicians, no software, no waiting • No phone lines, cable service, or software are required • Just plug the modem into a wall outlet, and start surfing
- **Portable** — *Internet that you can take with you* • Go online at home or anywhere in our coverage area • Clearwire's advanced technology has greater range than Wi-Fi • Transmits signal through the air — not through wires • No need for a phone line or cable connection
- **Fast** — *Up to 25x faster than dial-up* • Download pictures, music and videos • Up to 2.0 Mbps download / 256k upload speeds
- **Reliable** — *Always on, always secure* • No waiting for connections • It's our network — we own it, we operate it
- **Affordable** — *Only the internet speed is high, not the price*

➤ **Email** — *Keep in touch with Clearwire® email* • Clearwire gives you several email accounts that you can personalize and manage online. Check email on the Web from anywhere in the world or use your favorite email program. Your service includes anti-spam protection and Clearwire plans offer from 3 to 8 email addresses depending upon the plan you choose. You can also purchase additional email addresses with any plan.

➤ **IP Address** — *Get support for gaming and remote access* • An IP address is a number assigned to your computer that identifies it on the internet. You might need static IP address if you plan to use remote management software like PC Anywhere, Remote Management, or Terminal Server. Some VPN connections also require a static IP address.

Check with HCR Agent for more information on how use these  
features.
